In the classic Content experience, use the **Content** link to access course materials, complete required activities, and monitor your completion progress on topics contained within each course module.

An Overview of the Content Tool

- When you access a course's **Content** tool for the first time, the first page you land on is the **Course Syllabus**, which instructors might use to post the course syllabus and introductory material. You can print and download a course syllabus directly from the **Course Syllabus** page. If your instructor has left the **Course Syllabus** area blank you will not see it listed and you will select the **Table of Contents.**

- Topics you bookmark appear in a list on the **Bookmarks** page. The number beside the Bookmarks link indicates how many bookmarks you have.

- The **Course Schedule** page lists course material due dates, start dates, end dates, overdue course activities, and all events within the course from the **Calendar** tool for the next seven days. The number of overdue items in the course appears in red. Course events are also listed in the **Calendar** tool.

- Only topics with a set due date but no end date or an end date later than the due date appear on this list since you must have time remaining after the due date to access and complete the topic. The **Overdue** tab only appears if you have content topics that are not complete by the set deadline. The number of overdue topics in the **Overdue** tab appears in red beside Course Schedule in the Content menu. When you access an overdue topic, it disappears from the list in the **Overdue** tab. When you complete all overdue topics, the **Overdue** tab disappears from the Course Schedule area.

NOTE: Adding a due date to a content item that is associated to an assignment will override an end date that is also set on the same assignment.

- The **Table of Contents** panel lists all modules available in your course. If numbers appear beside each module name in the Table of Contents panel it indicates that topics are being tracked for completion, and that you have a number of topics you have not accessed.

- **Print** your course outline or navigate to a module's landing page to print a module's outline.
