**HEPATITIS B (HBV) IMMUNIZATION [TO BE COMPLETED BY ALL NEW STUDENTS]**

Hepatitis B (HBV) is a serious viral infection of the liver that can lead to chronic liver disease, cirrhosis, liver cancer, liver failure, and even death. The disease is transmitted by blood and or body fluids and many people will have no symptoms when they develop the disease. The primary risk factors for Hepatitis B are sexual activity and injecting drug use. This disease is completely preventable. Hepatitis B vaccine is available to all age groups to prevent Hepatitis B viral infection. A series of three (3) doses of vaccine are required for optimal protection. Missed doses may still be sought to complete the series if only one or two have been acquired. The HBV vaccine has a record of safety and is believed to confer lifelong immunity in most cases.

\_\_\_\_\_ I hereby certify that I have read this information and I have received the initial dose of the Hepatitis B vaccine.

Date of initial dose of the Hepatitis B vaccine: \_\_\_\_/\_\_\_\_/\_\_\_\_

\_\_\_\_\_ I hereby certify that I have read this information and I have elected to receive the Hepatitis B vaccine and/or I am in the process of receiving the complete three dose series of the Hepatitis B vaccine.

\_\_\_\_\_ I hereby certify that I have read this information and I have elected NOT to receive the Hepatitis B vaccine.
