

ATTACHMENT FOR FORM A (experimental projects)

1. State your complete hypotheses.
2. State your independent variables (what you are manipulating in your study). How many groups or conditions do you have? Describe what participants in each condition will be exposed to.
3. State how your subjects are assigned to groups or conditions.
4. What will your subjects do? For example, read a scenario, view a video, ride an exercise bike, etc.
5. What are your dependent variables? How are you measuring the effects) of your independent variables on behavior?
6. Include a statement about guaranteeing anonymity and/or confidentiality.
7. State the details of your debriefing process.
