

ATTACHMENT FOR FORM A (Non-experimental projects)

Please provide the following information:

1. State your research objective/purpose, research question(s) or hypotheses.
2. Include a statement as to any possible benefits to participants. If none, state so.
3. State any possible risks to the participant. If none, state so.
4. List any incentives and/or costs beyond daily life, if applicable.
5. How will you be using subjects in your study? Will you be observing human subject, interviewing human subjects, or distributing a questionnaire to individuals or groups of individuals?
6. How will consent be obtained?
7. How will subjects be selected (randomly or non-randomly)? What type of sampling technique will be used?
8. Include a statement about guaranteeing anonymity and/or confidentiality?

ATTACHMENT FOR FORM A (Experimental projects)

Please provide the following information:

1. State your complete hypotheses.
2. State your independent variables (what you are manipulating in your study). How many groups or conditions do you have? Describe what participants in each condition will be exposed to.
3. State how your subjects will be recruited and assigned to groups or conditions.
4. What will your subjects do? For example, read a scenario, view a video, ride an exercise bike, etc.
5. What are your dependent variables? How are you measuring the effects) of your independent variables on behavior?
6. Include a statement about guaranteeing anonymity and/or confidentiality.
7. State the details of your debriefing process.
