Dean Searches

As discussed at the Executive Committee Meeting on June 14, 2018, the Dean Search Committees for the Whitson-Hester School of Nursing, the College of Agriculture & Human Ecology and the College of Engineering were formed during the fall semester. These committees were formed through a process of nominations and elections to ensure diverse representation in all aspects. As stated in the formal charge below, the committee was asked to play an active role in identifying qualified individuals, recruiting and encouraging nominations and applications, and monitoring the confidential applicant pool and provide the Provost with an unranked list of final candidates. The committee was given target dates of conducting interviews through February, March and April respectively. Each committee continues to meet regularly and they are still on track to meet their proposed timelines.

Charge to the Search Committees

In this formal charge to the search committee, I ask each member to play an active role in identifying qualified individuals, recruiting and encouraging nominations and applications, and monitoring the confidential applicant pool to ensure quality and diversity. I ask that the committee conduct a review of the candidate pool and recommend to me a list of individuals that it deems most highly qualified. The final list of candidate recommendations should be unranked and should include qualifications, strengths, and weaknesses of each individual.

Please note that the names of any candidate(s) are not public until they are announced as finalists for on-campus interviews. Confidentiality is absolutely essential during the entire search committee phase of this process.

Charge to the Committee

In this formal charge to the Tenure Policy Committee, I ask each member to play an active role in performing a critical review of the current Tenure Policy (205) and drafting a revised Tenure Policy that focuses on the components associated with attaining tenure. These include components of the policy associated with eligibility for consideration of tenure, tenure-track timeline and reviews, tenure review/recommendation/decision participation, criteria to be considered, and (possibly) decision appeals.

The proposed policy should be straightforward and comprehensible and facilitate effective and efficient processes. The proposed policy should reflect the core values of Tennessee Tech University and foster the development and retention of faculty who excel in their discipline and advance the university's mission, including enduring education, impactful research, and collaborative service.

The revised policy should be proposed to the Board of Trustees in the June 2019 Board meeting. In order for the process to meet this target date, a final draft should be completed by February 1, 2019.

Thank you for serving on the Tenure Policy Committee. The Tenure Policy is one of, if not the most, critical policies of a university. I deeply appreciate the time and effort that you each will devote to this task. Thank you!

Post Tenure Policy Committee

The Post Tenure Policy Committee convened during the fall semester and has continued to meet regularly. As stated in the formal charge below, the committee was asked to draft a revised Post Tenure Policy that focuses on the components associated with the time following award of tenure. The committee was given a target date of February 1, 2019 to provide a completed draft, which would allow this policy to meet all stages of the approval process and be presented at the June 2019 Board Meeting.

Charge to the Committee

In this formal charge to the Tenure Policy Committee, I ask each member to play an active role in performing a critical review of the current Tenure Policy (205) and drafting a revised Post Tenure Policy that focuses on the components associated with the time following award of tenure. These include existing components of the policy associated with transfer of tenure and termination of tenure, and (possibly) additional components associated with initiation of remediation plans, decision appeals, etc.

The proposed policy should be straightforward and comprehensible. It should focus on policies and not the details of procedures. It should facilitate effective and efficient processes. The proposed policy should reflect the core values of Tennessee Tech University and foster the development and retention of faculty who excel in their discipline and advance the university's mission, including enduring education, impactful research, and collaborative service. Finally, the policy should enhance public trust in the University by demonstrating that the faculty holds itself accountable to high professional standards.
