

Creating Content for Courses

- **Accessible Documents**

- Chances are you have a lot of content you have already created. These documents can be uploaded into the Content Tool in iLearn or other locations like WordPress.
- [SensusAccess](#) – Need to make a document accessible? You can upload a document to this site and get an accessible version (for most documents) emailed to you. This does not include documents with a lot of graphical equations.
- [View more information about Accessible documents](#) and information on the [Accessible Education Center](#).

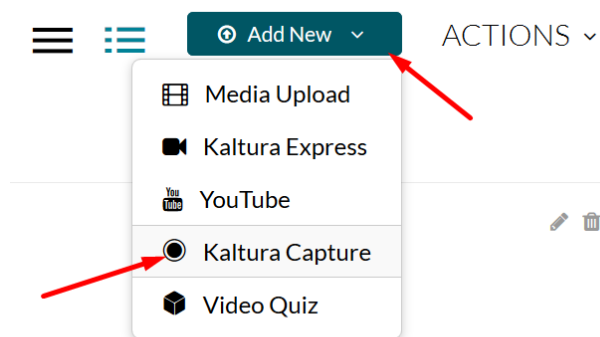

- **Videos**

There are several options for how to add video content to your course: Kaltura, Video Note, PowerPoint with Voicceover, or Doceri. Information for each option can be found below.

Kaltura

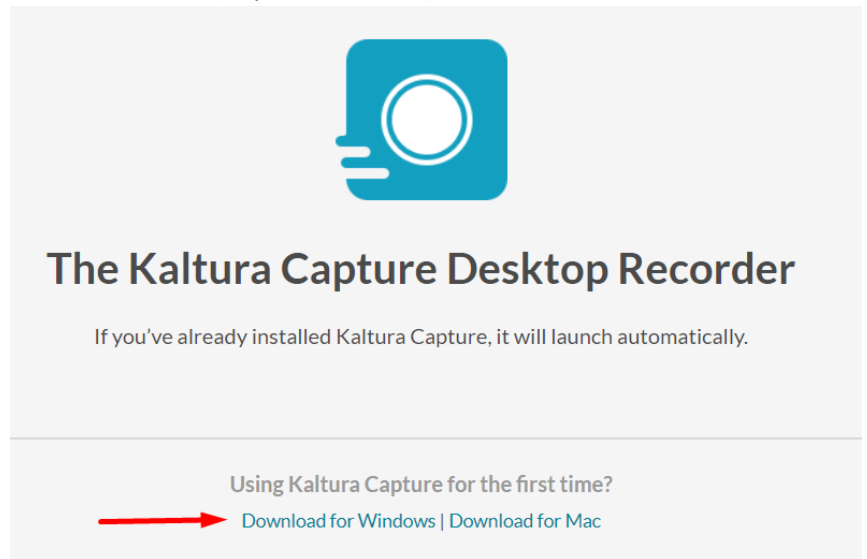

- Downloading Kaltura Capture

- Login to download **Kaltura Capture**
 - For *iLearn*, go to **Tech Express** or ilearn.tntech.edu
 - For *MediaSpace*, go to media.tntech.edu
- Once logged in, for iLearn, select **My Media** in the navigation (or go to a course and choose **Media - My Media**)
- Select the **Add New** button (iLearn) or link (Mediaspace)

- Choose **Kaltura Capture**
- To Download,

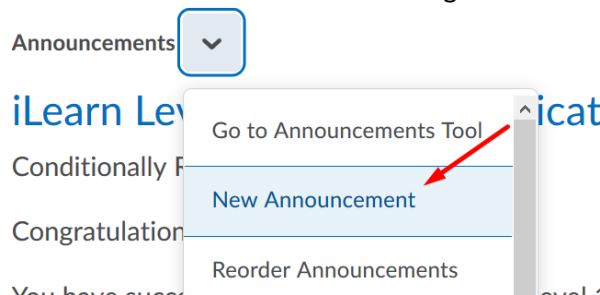

- For Windows (or personal Macs), select the download link

- For Macs (on TTU machines), go to **Self Service** and download Capture from there.
 - Install the software
- Learn more about the [Kaltura Capture Settings](#).
- [Kaltura Capture recording options and uploading to Kaltura/iLearn](#)
- [Uploading a video file made outside Kaltura Capture and link to Content in iLearn](#)

Video Note

- The internal Video Note option in iLearn (D2L) allows for recording up to 30 minutes. This is a quick and easy way to add Announcements and short bits of information in the course.
 - To add it to the Announcements, go to the course and select **New Announcement** in the arrow to the right of Announcements.

- Enter a **Headline**

- Select the **Insert Stuff** button

Headline *

My New Announcement

Content *

   ▼ Paragraph ▼ **B** *I* U

Insert Stuff

- Choose **Video Note** (TIP: You can also link to YouTube videos using the Insert Stuff button in Announcements, Content, Discussions and anywhere you see this HTML editor.)

Insert Stuff	Insert Stuff
