

Auralia/Musition LTI

From [LTI 1.3 with Canvas](#)

Creating assignments

You can add links to Auralia and Musition from both the assignments and the modules sections in your courses. Modules would be a good place to place Auralia and Musition practice links. Assignments have scores associated with them that will be recorded in the grade book, so use Auralia and Musition task links for assignments.

To add to modules:

1. Open a course then click the Modules link in the Course Navigation.
2. In the Module where you'd like to add the link, click the + button.
3. In the Add [Item Type] To: drop-down menu, select External Tool.
4. Find the Auralia / Musition external tool, click it, and then select from the choices shown: Auralia Practice or Musition Practice. Set a name for the new link (you can edit it later in Canvas).
5. Save the new item.

To create an assignment:

1. Open a course then click the Assignments link in the Course Navigation.
2. Click the + button to create a new assignment, then More Options to see the full assignment settings.
3. Set a name, description, and maximum points for your assignment. You must set the maximum points in order to receive scores from the tool.
4. Set the submission type to External Tool.
5. Find the Auralia / Musition external tool, click it, and then select from the choices shown: Auralia Task or Musition Task. Set a name for the new link (you can edit it later in Canvas).
6. Save the new item.
7. Canvas should open the new assignment automatically and Auralia / Musition will launch.
8. Select an existing Auralia or Musition test or course to use or create a new one, then click Attach to associate this with your Canvas assignment.
