Phases of Online Learning Course Design

Definition of “Alignment”

- Thoughtful pedagogic planning
- Connection between learning objectives, learning activities and assessment
- Gather elements: learning objectives, assessments, activities, materials, technology
- Utilize Bloom's Taxonomy
- Plan course design using an alignment map

Alignment

A **well-aligned course** means that all components of the course contribute to the learner's experience and lead them directly towards achieving the expected outcome

Establishing Powerful Learning Outcomes

Backwards Design

Begin with the end.

Stages of Backward Design:

- Identify Desired Results
- Determine Acceptable Evidence
- Plan Learning Experiences and Instruction

Course Alignment Matrix

Course Alignment Matrix

Course Alignment Matrix: Objectives

Course Alignment Matrix: Assessment

Course Alignment Matrix: Instructional Materials

Complete this matrix to demonstrate the **alignment** between course-level instructional objectives, module-level learning outcomes, level of Bloom's for each set of objectives, and assessments for the entire course.

Alignment refers to the *direct link* between the objectives, the assessments and measurements, and the resources and materials. Under the principle of alignment, the instructional materials and assessments are driven by and support the objectives.

Bloom's Taxonomy is a classification of the different objectives and skills that educators set for their students
