

Expand Your Team's Capacity to Support Student Academic Success & Wellness

When your team is offline, Student Success Agency is online to ensure students are connected to supports when and where they need them.

What if student support was as easily accessible as TikTok or Snapchat? With Student Success Agency, it is.

Our near-peer “Agents” are available on nights and weekends via a secure, encrypted app to answer students’ questions, advise on post-secondary options, or simply talk through the ups and downs of the day. Students can also connect with on-call specialists for tutoring or mental health services.

“

I don't know of any other service that offers support on a social and emotional level, as well as academic exposure and motivation [with conversations] about careers and college. All of that looped into one service is absolutely amazing.”

—Dawn Bradley Cooper,
Assistant Vice Chancellor of
College Access Initiatives at
the Board of Regents of the
University System of Georgia

A LIFELINE FOR OVERBOOKED STAFF AND OVERLOOKED STUDENTS

Agents craft a personalized action plan to improve and monitor students’ well-being and progress toward their goals. School counselors and staff receive insights about challenges, opportunities, and successes from Agents, helping expand wraparound services to all students.

Improve Academic and Post-Secondary Outcomes

From day one, our mantra has been: “If NBA superstar LeBron James has an agent, so should every student.” We believed then that 1:1 mentorship would lead to all sorts of amazing outcomes. After nearly a decade, we can prove it does:

30% increase in college enrollment

13% increase in attendance rates

20% higher GPA among participants

27% increase in FAFSA completion

Tier I ESSA Evidence-Based
Solution

Stay in-the-Know About Student Safety and Mental Health Needs

Relationships with Agents create a safe and trusted outlet for students. If a student shares that they are struggling, Agents can connect them to a licensed social worker on the Safety Team, which is available seven days a week to de-escalate student mental health crises.

Schools were unaware of 95% of the safety cases that Agents had brought to their attention. 2/3 of those cases did not require additional resources from the school or district.

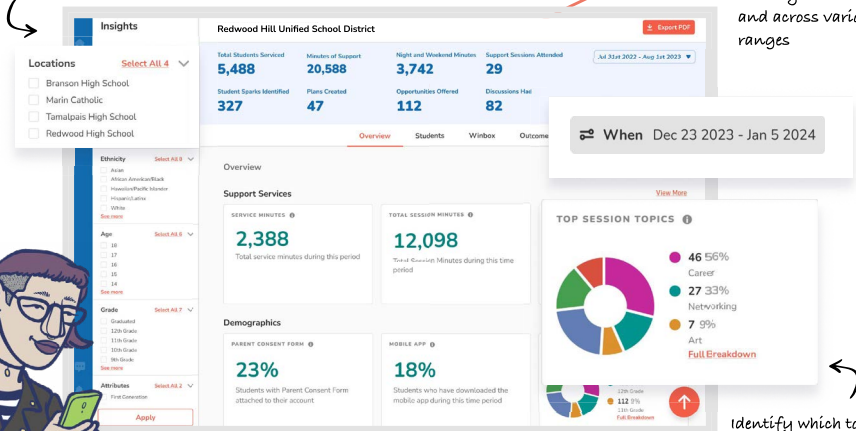

Empower Student Voice

Conversations with Agents are always student-centered, creating a space for teens to ask for the support they need in their own words. Every month, school staff receive reports that show trends in session topics.

This allows school administrators to gauge school climate and student interest and identify systematic improvements that may be needed.

Filter your data in many ways, like by student locations

Track your data real time and across various date ranges

Identify which topics your students are having conversations about

Meet the Agents!

Agents Are:

RIGOROUSLY VETTED & TRAINED

Agents are required to pass a screening through the National Association of Professional Background Screeners.

They also complete safety training and receive certified assistance from licensed professionals within Student Success Agency's Safety Team.

AS DIVERSE AS THE STUDENTS THEY SUPPORT

Agents are matched with students who share similar and career interests.

- 35% of Agents are/were first-gen college students
- 63% of Agents are people of color
- 32% of Agents speak a second language
