## Rings and Things with Bob Coogan: Weeklong Workshop, August 2 - 7

### Material List

**Material fee:** \$50 - \$80

**Students should bring:** any personal jewelry tools they have including a saw frame, saw blades, silver sheet and wire if desired, copper and brass files including needle files and half round ring files. Wet and dry sandpaper ring mandrel if they have it, silver solder. the studio will have all the needed tools and materials if the student doesn't have them

*Participants should wear closed-toe shoes and tie back long hair. Refrain from wearing loose jewelry or clothing that could lodge itself into equipment or get in the way. We recommend wearing studio-appropriate clothes that you don't mind getting dirty, dusty, or stained. You may want to bring an apron. For classes that require working with hot materials (blacksmithing, glassblowing, and torchworking) we recommend wearing non-synthetic materials- synthetics contain plastics that can melt when in proximity to high heat.*

*General protective gear will be provided by ACC during workshops when necessary, including safety glasses and dust masks, but participants are encouraged to bring their own protective gear if they have it.*
