

Definition of Unit

Definition of Unit: Human Ecology

Reporting Year: 2018-2019

Providing Department: School of Human Ecology

Department/Unit Contact: Melinda Anderson

Mission/Vision/Goal Statement:

In March 2019, the School of Human Ecology reviewed its Vision and Mission statements as a result of completing the Tech Tomorrow Strategic Planning process. After several weeks of review and discussion, Human Ecology faculty voted to slightly revise our mission statement to better reflect the new university strategic plan. The vision statement was found to still be appropriate and was not changed.

The current vision is: To be recognized as a premier program in Human Ecology and as an agent for advancing quality of life and fostering leadership in individuals, families and communities.

The old mission was:

The School of Human Ecology provides education, research, service, resources, and leadership to empower students and professionals to assist individuals, families and communities to achieve optimal quality of life.

The new 2019 Mission is:

The School of Human Ecology provides education, research, service, resources, and leadership in order to foster creativity, tenacity and analytical problem solving in our students as well as facilitating career ready graduates to empower individuals, families and communities to achieve optimal quality of life.

These statements were approved by all faculty and are being updated on our website and other internal documents. These statements reflect the efforts of the faculty to provide undergraduate education, research, service projects, and professional development opportunities in child development and family relations; child life; family and consumer sciences education; nutrition, and dietetics; housing and design; foodsystems administration and merchandising and design. The School is housed within the College of Agriculture and Human Ecology, and is accredited by the American Association of Family and Consumer Sciences (AAFCS). Additionally, the dietetics curriculum holds accreditation from the Accreditation Council for Education in Nutrition and Dietetics (ACEND); and the Family and Consumer Science Education curriculum is accredited by the Council for Accreditation of Educator Preparation (CAEP). In 2015, the Child Development and Family Relations concentration received approval from the National Council on Family Relations (NCFR) to offer the Certified Family Life Education (CFLE) certification through the CDFR concentration. The Child Life curriculum just received Endorsement status from the Association of Child Life Professionals (our CL curriculum had previously held Approval status; Endorsement is a new national standing and TTU is the 5th Child Life Program in the nation to achieve Endorsement status). The School is aligned with the University Vision, Mission and Tech Tomorrow Plan to provide education for life, innovation in all we do, exceptional stewardship, and engagement for impact.

Curriculum Mapping :

Distribution of Body of Knowledge Components throughout a Core Curriculum											
Core Course	Core Concepts				Integrative Elements		Cross-Cutting Themes				
	Basic Human Needs	Community Vitality	Family Strengths	Individual Well-being	Life Course Development	Human Ecosystem	Appropriate Use of Technology	Capacity Building	Global Interdependence	Resource Development & Sustainability	Wellness
HEC 1005		X				X					
HEC 1010	X				X						X
HEC 2065			X	X							
HEC 3011						X		X		X	
AGHE 4500							X		X		
Outcomes Met (#/%)											
Outcomes Met (%)											
Analysis:	Program Strengths (80-100% Outcomes Met)						Program Weaknesses (79% or fewer Outcomes Met)				
Follow-Up	What strategies will the Unit develop to improve the weaknesses while not diminishing the strengths of the infusion of the Body of Knowledge throughout this Core curriculum?										

Goal/Objective/Outcome

Program Goal 1: Maintain Accreditations

Define Goal:

1. The School of Human Ecology will maintain program quality sufficient to meet and/or exceed accreditation standards from the American Association of Family and Consumer Sciences (AAFCS), the Accreditation Council for Education in Nutrition and Dietetics (ACEND), and the Council for Accreditation of Educator Preparation (CAEP).

Intended Outcomes / Objectives:

The School of Human Ecology will be in 100% compliance with all external accreditation requirements. In addition, the School will comply with Child Life Endorsement standards.

Program Goal 2: Student Enrollment

Define Goal:

2. The School of Human Ecology will maintain sufficient student enrollment at the undergraduate and graduate levels to ensure the viability of the program and course offerings, and the School of Human Ecology will exceed university rates for retention and graduation.

Intended Outcomes / Objectives:

Human Ecology (HEC) undergraduate enrollment will increase at least 3% annually.

Fall to fall retention rate will be the same as or exceed university retention rate. The new Family and Consumer Sciences graduate concentration within Curriculum and Instruction will enroll 2 new students annually.

Program Goal 3: Adequate Faculty

Define Goal:

3. The School of Human Ecology will hire and support a diverse faculty unit with appropriate expertise to deliver a high-quality program.

Intended Outcomes / Objectives:

1. The external accreditations provide guidelines for number of faculty and qualifications of faculty in specific concentrations. These requirements will be maintained by all faculty teaching in the School of Human Ecology. Adjunct and temporary faculty members will have the appropriate credentials for the content area in which they are teaching.

2. Students have the opportunity to rate teacher excellence on the IDEA evaluations. HEC faculty benchmark for Teaching excellence will be 3.75/5.0 (cumulative average score across two semesters).

Student Learning Outcome 2: Student Skills

Define Goal:

2. Students will be prepared for life-long success in their careers and for graduate study as evidenced by their critical thinking skills, communication skills and ability to work effectively with others.

Intended Outcomes / Objectives:

HEC students will be rated by site supervisors during field experience/internships courses as being competent in communication skills and ability to work with others. Site supervisor evaluation benchmark score is 80%. IDEA evaluations of all courses allow students to self-evaluate progress on relevant objectives, which include critical thinking skills. IDEA benchmark score per class is 3.75/5.0 scale (75%).

HEC Students complete the California Critical Thinking Skills test annually. Monitor their scores against TTU mean and national mean.

Student Learning Outcome 1: Student Competence

Define Goal:

1. Students will demonstrate competent knowledge in the American Association of Family and Consumer Sciences Body of Knowledge as evidenced by a score of 70% or better on the internal Human Ecology Exit Exam.

Intended Outcomes / Objectives:

HEC students will score a minimum of 70% on HEC Exit Exam

Assessment Tools

Program Goal 1 Assessment of Accreditations

Goal/ Outcome/ Objective:

The School of Human Ecology will maintain program quality sufficient to meet and/or exceed accreditation standards from the American Association of Family and Consumer Sciences (AAFCS) and the Accreditation Council for Education in Nutrition and Dietetic

Type of Tool: National Accrediting Agency Requirements and Standards

Frequency of Assessment: annually

Rationale:

Maintaining professional accreditations ensures a high quality curriculum

Program Goal 2 Assessment : Enrollment and Retention

Goal/ Outcome/ Objective:

The School of Human Ecology will maintain sufficient student enrollment at the undergraduate and graduate levels to ensure the viability of the program and course offerings

Type of Tool: FTE Enrollment

Frequency of Assessment: annually

Rationale:

- a. Count enrollment during each fall semester, based on TTU Institutional Research official enrollment counts for Human Ecology. Sustainability of unit is dependent on increasing student enrollment to maximize resources, and growing the unit.

- b. Fall to fall retention shows number of freshmen retained.

Program Goal 3 Assessment of Faculty

Goal/ Outcome/ Objective:

The School of Human Ecology will maintain adequate faculty with appropriate expertise to deliver a quality program.

Type of Tool: Annual Unit Report

National Accrediting Agency Requirements and Standards

Frequency of Assessment: annually

Rationale:

Accreditation reports provide feedback on faculty expertise, but are only done every 5-10 years; IDEA reports are completed each semester and provide data on student perception of faculty teaching competence; faculty annual reports.

Student Learning Outcome 1 Assessment

Goal/ Outcome/ Objective:

Students will demonstrate competence in the content areas of Human Ecology as evidenced by a passing score on internal Human Ecology exit exam

Type of Tool: Exit Exam

Frequency of Assessment: each semester

Rationale:

Benchmark is 70% mean score.

Attached Files

 [Core Exit Exam FALL 2018.docx](#)

Student Learning Outcome 2 Assessment

Goal/ Outcome/ Objective:

Students will be prepared for life-long success in their careers and for graduate study as evidenced by their critical thinking skills, communication skills, and ability to work effectively with others

Type of Tool: Other

Frequency of Assessment: Each semester

Rationale:

A) For the IDEA evaluations, we will expect to see our students meet or exceed institutional and national averages when comparing progress on relevant course objectives. The California Critical Thinking Skills test is administered annually.

B) Site Supervisor/mentoring teacher assessment reports – each concentration in Human Ecology requires either a service learning course (internship, practicum or field experience) or student teaching (for Family and Consumer Sciences (FCS) Licensure). Using the evaluations from these site supervisors or mentoring teachers allows us to collect data about our students learning outcomes from external sources. One evaluation form is used for all of these service-learning courses. The form is collected by the faculty, and submitted to the Director each semester. For the site supervisor evaluations, this assessment tool will be revised to an electronic version and we will expect our students to score at an 80% benchmark or better in ability to work effectively with others in a service learning setting.

Results

Results for Program Goal 1:Accreditations

Goal/Objective/Outcome Number: Goal 1

Results:

The School of Human Ecology holds three external accreditations. The School completed a 10-year site visit with the American Association of Family and Consumer Sciences in February 2018. The results of this site visit were received in 2018 and the School received full accreditation until 2029 from AAFCS. The ACEND annual report was submitted in December 2018. The teacher education statistics for our students was reported to the Office Teacher Education at TTU for compliance with CAEP. The College of Education completed a CAEP site visit in April 2018 and those results were very positive. Dr. Sisk submitted the application for Endorsement status for the Child Life (CL) Concentration in October 2018; and the results of that application have just been received. The CL program is an Endorsed program from the Association of Child Life Professionals. All accreditation compliance data and reports have been submitted on time to the appropriate professional organization in 2018-2019.

Results for Program Goal 2: Student Enrollment and Retention

Goal/Objective/Outcome Number: Goal 2

Results:

Table 1. Fall Enrollment by Unit 2008-2018

	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
	194	175	201	205	266	263	252	259	257	242	240

Enrollment for Human Ecology has increased overall the past 10 years. However, the enrollment decreased 1% between 2017 and 2018. The benchmark of 3% was not achieved. University enrollment overall has declined/remained level during the past 3 years as a result of Tennessee Promise; 2 years of free community college has had an impact on enrollment for all departments.

The Fall 2017 cohort fall to fall retention rate for new freshmen in Human Ecology was 90%, compared to 75% for the university. Our rate of 90% exceeds the university rate and we have met this expectation.

Other benchmarks which speak to success with enrollment and retention include Degrees conferred: this number increased by 10 students between 2016-2018 and stands at 71 for the 2017-2018 year. The HEC Graduation Rate for Graduated within Department is 56% for the Fall 2012 cohort; up 16% from the 2011 cohort. The TTU Graduation Rate for this same time period is 51%.

Results for Student Learning Outcome 2

Goal/Objective/Outcome Number: Student Learning Outcome 2**Results:**

Site Supervisor Scores:

During Fall 2018, 13 students completed experiential learning hours. The site supervisor evaluations averaged 4.68 on a 5.0 scale to equal 94%. During Spring 2019, 28 students complete experiential learning hours. The site supervisor evaluations averaged 4.54 on a 5.0 scale to equal 91%. Both of these semesters revealed that students well exceeded the benchmark of 80% on site supervisor evaluations.

California Critical Thinking Skills Test (CCTST) results:

2017-2018 n=45 Mean = 14.3**2016-2017** n=34 Mean = 17**2015-2016** n=53, Mean = 16.2**2014-2015** n=67, Mean = 19.0

Modifications and Continuing Improvement to Goals/Objectives/Outcomes

Modifications: Program Goal 1 Accreditations

Goal/Objective/Outcome Number: Program Goal 1 Accreditations

Program Changes and Actions due to Results:

The external accreditations held by the School of Human Ecology (ACEND, AAFCS, CAEP) are monitored by the Director of the School. Dr. Anderson also continues to serve as the DPD Director for the accredited dietetic program.

The ACEND letter received in April 2017 provides documentation that the TTU DPD Program has met all monitoring requirements and maintains full accreditation status through 2020 when the next accreditation site visit will occur. New dietetic accreditation standards were published in June 2017 and documentation was submitted in January 2018 to show compliance with these new ACEND standards. The report was accepted by ACEND. Additional review of the DPD student data and compliance with revised 2017 Accreditation standards was completed in July 2018; and again in May 2019. Minutes of these meetings and results of the data analysis show that the DPD program continues to be in compliance with ACEND standards. A 7-year site visit will occur in late 2020.

The AAFCS site visit was held in February 2018. The final vote on accreditation status was received in Fall 2018; The School of Human Ecology received full accreditation for another 10 year cycle. Prior to the site visit, the HEC faculty carefully reviewed all core classes against AAFCS content requirements and decided to adopt a new CORE set of classes- to be effective Fall 2019. These classes are: HEC 1005, HEC 1010, HEC 2065, HEC 3011 and HEC 4005 (now AGHE 4500). Faculty members Sisk and Chitiyo received a QEP grant to revise the HEC 1005 class in Spring 2019, utilizing best practice teaching methods for a freshmen level class and incorporating a peer mentor model. They will teach the course again in Spring 2020 and will compare results from two teaching methods for purposes of retention in the major, and competence in the Body of Knowledge. Those results will be reported in next year's IE report.

The revision of the HEC exit exam was completed in Fall 2016 and administered during Fall 2016, Spring 2017, and Fall 2017. In spite of several revisions to content and question structure, the overall 5-year average score remains below the benchmark of 70%; but is showing steady improvement. Discussion of scores by faculty has resulted in several ideas: Strongly emphasis the body of knowledge content in early core classes; put body of knowledge requirements on each core syllabus to alert students to the connection to AAFCS standards; and realign assignments to reflect body of knowledge statements and applications. The Fall 2017 results show a continued improvement in scores with a class average of 78.8%. The faculty have implemented adding the body of knowledge statements to all syllabi; and a new Body of Knowledge exam has been added to the HEC 1005 class as a "pretest" for the exit exam. During Spring 2018 the exit exam was administered; but copies were inadvertently mixed up and the results of the exam became invalid. It was decided to not use the Spring 2018 results. Results from Fall 2018 and Spring 2019 show that 26 students took the exam in Fall 2018 and had a mean score of 75.92%; with 46 students completing the exam in Spring 2019 for a mean score of 68.74%. The new 5-year average is 69.02; just below the benchmark of 70%. Dr. Anderson will present these results at the Fall 2019 faculty meeting and the questions will again be reviewed for accuracy.

For CAEP compliance, Dr. Melinda Swafford has full responsibility for aligning HEC education courses with Office of Teacher Education requirements. All HEC education courses comply with CAEP requirements and all have TK20 compliance embedded in course assignments. Dr. Swafford chairs the Teacher Education committee, and keeps HEC faculty informed of any updates to CAEP standards. During this past year, minor changes were made to the HEC Education curriculum to reflect changes in the Teacher Education program. Dr. Swafford is retiring effective July 31, 2019 and a new faculty member, Dr. Elizabeth Ramsey will be responsible for compliance with the Teacher Education requirements.

Experiential Learning

Research, Scholar, Intellect, and Creativity

Programs, Certificates, and Training

Modifications: Program Goal 2 Enrollment and Retention

Goal/Objective/Outcome Number: Program Goal 2 Enrollment and Retention

Program Changes and Actions due to Results:

Enrollment has continued to decline the past 3 years and the benchmark of 3% was not met. Recruitment activities this past year (fall 2018) included the university Preview Day; Homecoming events; and several high school visits. Enrollment overall at the university has been steady or slightly lower than projections during the past 3 years. For 6 months during 2018-2019 the College of Agriculture and Human Ecology was able to hire a part-time recruiter who worked to establish new relationships with area high schools; and updated all social media outlets for the college. Funding for the position was temporary; and ended in June 2019. New funding will have to be determined in order to hire a new person.

Human Ecology participated in the university-wide Preview Day Fall 2018.

Student Success Director Mr. Chris Kohl was hired in August 2017; and began supervising the College Ambassadors in January 2018. These ambassadors attended high school career fairs to represent both the School of Agriculture and Human Ecology; additionally the Ambassadors were involved in each prospective student visit and followed up with each prospective student.

The retention rate for the School of Human Ecology remains steady. Events completed this past year include: Welcome back activities at the beginning of fall semester; consistent follow up with students not attending class (both faculty and Mr. Kohl do this); and a new digital monitor placed at the College entrance to remind students of college events and student club meetings. Funding for food events was not available this year (due to budget cuts) and the usual picnic and welcome back for Spring semester was not held; although a small event was held at the beginning of Fall 2018 semester.

Link to Assessment:

Monitor enrollment numbers each semester; monitor fall to fall retention rates

Efficiency and Effectiveness

Modifications: Program Goal 3 Adequate Faculty

Goal/Objective/Outcome Number:

Program Changes and Actions due to Results:

Each full-time, temporary and adjunct faculty member in the School of Human Ecology has the appropriate credentials for the content area in which they are teaching, according to SACSCOC requirements and the external accrediting agencies.

Faculty credentials are monitored by the Director before a person is hired, and monitored by Academic Affairs and Human Resources.

Dr. Sung Yi was hired in Spring 2018 and began employment August 1, 2018. He teaches the Food Preparation and Quantity Food Production classes (Friday Cafe) and the Foodsystem Administration class.

In reviewing IDEA scores for Teaching Excellence, the HEC faculty have a combined average of 4.5 on a 5.0 scale (this represents 32 classes and 9 faculty from Spring 2019 semester)

New action: continue mentoring of new faculty and observations of teaching practices; continue to provide financial assistance to faculty to attend professional development events

Diversity

Technology Infused Programs

Sustainable Partnerships

Modifications: Student Learning Outcome 1 Student Competencies

Goal/Objective/Outcome Number: Student Learning Outcome 1 Student Competence

Program Changes and Actions due to Results:

The HEC exit exam is administered each semester in the Senior Seminar class. During Fall 2016, the exam was extensively revised, based on the previous 3 years scores being below the benchmark of 70%. It was determined that the exam content had not been updated in several years, and that some questions were poorly constructed. Each HEC faculty member reviewed their own content portion of the exam as well as the core portion. New questions were created, reviewed and approved by the faculty as a whole. A pilot exam was given to 139 students during fall semester to explore the validity and reliability of the new questions. The results of this pilot exam formed the basis for the new Exit Exam which was given for the first time in Fall 2016. After this Fall 2016 exam, some minor wording changes were made based on individual question scores. The Spring 2017 version contained these changes. The Fall 2016 percent passed was 76.5% and the Spring 2017 percent passed was 75.8%; both

of these scores exceed the benchmark of 70%. The Fall 2017 average score was 78.8% and the Spring 2018 results were invalid and can't be used. The semester to semester averages continue to increase. Fall 2018 mean score is 75.92% and Spring 2019 mean score is 68.74%.

The five year average is now 69.02%; an improvement of 1% from the previous average.

Discussion of scores by faculty has resulted in several ideas: Strongly emphasis the body of knowledge content and terminology in early core classes; put body of knowledge requirements on each core syllabus to alert students to the connection to AAFCS standards/course content; and realign assignments to reflect body of knowledge statements and applications. Since the last revision of the questions was in 2016; it is time again to review the exit exam questions for accuracy and relevancy since the CORE classes have also been updated this past academic year.

Link to Assessment:

HEC exit exam scores reflect overall human ecology content knowledge.

Link to 'Tech Tomorrow' Strategic Plan: Programs, Certificates, and Training

Modifications: Student Learning Outcome 2 Student Skills

Goal/Objective/Outcome Number: Student Learning Outcome 2 Student Skills

Program Changes and Actions due to Results:

Site Supervisor scores come from the evaluation form used in the internship/field experiences classes. Each curriculum in Human Ecology requires a service learning course in the senior year, except Housing and Design; but students have the option and most choose to complete the internship. The Site Supervisor evaluation form is based on a 5-point scale. Site Supervisor scores for fall 2018 were 4.68/5.0 (94%) and in spring 2019 were 4.54/5.0 (91%). A total of 41 students (fall =13, spring =28) completed either the internship or field experience class during these 2 semesters. The benchmark of 80% was well exceeded both semesters, as site supervisors consistently rank HEC students as "above average" or "excellent" in the categories of professional attitude, communication skills, willingness to solve problems, and respect for co-workers.

IDEA scores for all full-time faculty for Fall 2018 show that all HEC faculty exceeded the benchmark of 3.75 (75%) demonstrating that HEC students overall rated the progress on course objectives as "substantial" or "exceptional"; an indication of competencies met within each course. For Spring 2019 Progress on Relevant Objectives, all HEC faculty but one exceeded the 3.75 benchmark. This new faculty member only taught 2 courses and the small number of courses does impact the overall scores.

Progress has been made this past year to convert the site supervisor evaluations to an online version. The university recently updated its version of FileMaker Pro; and the College of Education was working with IT to design a structure for Human Ecology to send electronic versions of this evaluation. Implementation of the Filemaker Pro software was to begin in Summer 2018.

Update: the FileMaker Pro software did not work out, and the evaluations were not converted to an online process. However, Dr. Anderson is looking at ways to put the Site Supervisor evaluation into a Qualtrics format that can be sent electronically.

Continue use of IDEA evaluations by all HEC faculty to monitor progress on course objectives.

Network of Scholars

Improvement to Assessment Plan

Improvements to Human Ecology Assessment Plan

Improvements to Assessment Plan:

During spring semester 2019, the School of Human Ecology faculty and staff completed a SWOT analysis in preparation for completing a new Strategic Plan. The University Strategic Plan, Tech Tomorrow was completed and made available to the academic units. The HEC Strategic Plan was completed, and the document is attached. The 2019-2020 IE report Program Goals and Student Learning Outcomes will be re-worded to include wording from the new strategic plan.

Program Goal 1: Accreditations- The School of Human Ecology completed the site visit in February 2018 from the American Association of Family and Consumer Sciences. Comparison of AAFCS body of knowledge standards to HEC Core courses has already resulted in realignment of course assignments, as well as the make up of the HEC Core. The School of Human Ecology received full accreditation for another 10 year cycle.

The CAEP site visit was completed in April 2018. Dr. Melinda Swafford has been working closely with the College of Education to provide information for their self-study document. The College of Education received full accreditation from CAEP.

Dr. Shipley maintains oversight of the Certified Family Life Educator (CFLE) coursework and made course changes in the past year to align with updates from the National Council on Family Relations who is the national agency for CFLE. Dr. Shipley reports that the School is currently in compliance with CFLE standards.

Dr. Cara Sisk maintains oversight of the Child Life curriculum and works closely with the Association of Child Life Professionals (ACLP). Dr. Sisk recently received word that the TTU Child Life Curriculum has received Endorsement status with ACLP.

Dr. Anderson maintains oversight of the Nutrition and Dietetics curriculum as DPD Director. The TTU DPD Program is in compliance with all ACEND accreditation requirements and is due to complete its next self study process in Fall 2020.

All external accreditations and endorsements will continue to be monitored for compliance.

Program Goal 2: Enrollment and Retention- Recruiting efforts will continue; HEC will participate in all campus recruiting events such as Preview Day (now called Family Day) and career fairs; as well as local career fairs including the Oakley Showcase Day; and HEC faculty will continue to visit area high schools as part of our FACS Ed teacher licensure program.

Retention benchmark was met and is higher than the university retention level. Efforts to retain students will continue: emailing all new freshmen at least twice per semester, making sure each new freshman is attending advising appointments, and connecting new freshmen with upper class students through student organizations. HEC Faculty are being encouraged to use university software platforms such as TechConnect and Degree Works to communicate with students and identify at risk students. A new AGHE 1020 course was created and was implemented Fall 2017. This course combines all new freshmen for Agriculture and Human Ecology into one course; and is the equivalent of UNIV 1020. Connecting all the freshmen in the college into cohesive groups should enhance retention efforts. All faculty in the college will visit the class at least once during the semester; and the course will retain student mentors by utilizing our College Ambassadors. It is unclear at this time, if the Student Success Director is tracking retention of the freshmen enrolled in AGHE 1020, to determine its usefulness to the College.

Program Goal 3: Adequate Faculty- All regular full-time faculty will continue to be encouraged to attend professional development events and be supported by HEC to attend. The new Lecturer in Foods, Nutrition and Dietetics (YI) began employment August 1, 2018. New hires as well as the retention of current faculty provide a stable foundation of course instruction for the School of Human Ecology. The Housing and Design Faculty position was not filled, and it was decided by the faculty to phase out the Housing and Design Concentration. Dr. Elizabeth Ramsey was hired to fill Dr. Swafford's faculty line,

and she begins employment August 1, 2019. The School is in progress of implementing a new MS Degree in Community Health and Nutrition and a salary line was repurposed to be able to hire a new Graduate Coordinator for this Degree. That faculty position began July 1, 2019 and is a tenure-track, 12 month position.

Student Learning Outcome 1: Student Competencies- The HEC exit exam will continue to be administered each semester during Senior Seminar class. The questions will be reviewed this fall semester and adjusted as necessary to reflect current course content. Body of knowledge content requirements will be clearly linked on each course syllabus to assignments that are measuring this knowledge. The scores did improve Spring 2016 to Spring 2019 (60% to 68.7%) indicating the newly revised exam is clearer and better aligned with content students are learning. The Benchmark of 70% continues to be a challenge, however.

Student Learning Outcome 2: Student Skills - Implementation of the new online version of the site supervisor evaluation will happen during Fall 2019 semester. The online version will allow for quicker and more efficient analysis of the data.

Threshold of Acceptability- HEC Faculty met on Aug 12 and discussed appropriate benchmarks for the core classes found on the curriculum map. It was decided to use "100% of those who participate in selected assignment will score 70% or better" The scores from Spring 2019 are being collated and will be added to the 2019-2020 IE report. Faculty also discussed standardizing the Human Ecology exit exam this fall semester; as a way to improve the overall score and better meet the benchmark. One comment voiced by faculty is that students don't always connect content from upper division classes with the exit exam (used to assess AAFCS curriculum standards); and we could be more purposeful in reminding students of how content aligns with AAFCS curriculum standards. We have added AAFCS curriculum standard statements to each core syllabus but will work to emphasize which assignments and content is being used to assess their competency with these standards.
