

## Video Lecture

This Basic page is a general-purpose layout.

The Video page layout includes an embedded YouTube video, which can scale in any browser or mobile device. Embedding videos in the page is a great way to present video content, while accompanying it with supporting context, explanations and activities.

## Replace Video

To replace the video,

1. Delete the video, and leave the cursor in-place. To do so:
  - a. click on the video and pause it
  - b. carefully click the area preceding (left of) the video within the colored video container
  - c. hit the Delete key
2. Click the **Insert Stuff** icon
3. Do one of the following:
  - o Select **YouTube**, search for your video; or
  - o Select **Enter Embed Code**, paste in the YouTube video embed code
