FAIR USE CHECKLIST

This checklist is a tool to assist you in determining whether you may make or distribute copies of works protected by copyright without having to obtain the permission of the copyright owner. It is recommended that you complete a copy of this form in connection with each “fair use” you make of a copyrighted work. The U.S. Copyright Act says that you as a faculty member of an accredited, non-profit educational institution are immune from damages resulting for an infringement if you have made a good faith effort to determine whether a use is “fair” under the copyright laws. Therefore you will want to retain this form for your records.

Name:______________________________________ Date:_____________________________

Class or Project:___________________________________________________________________

Title of Copyrighted Work:___________________________________________________________

Portion to be used (e.g. pages):_______________________________________________________

For each of the four sections below, determine whether that factor favors or disfavors a finding of fair use. No single factor is determinative of fair use. You must consider each factor whether or not, in your opinion it has the same degree of relevance as the other factors. Check all boxes that apply. Where the factors favoring a fair use outnumber the factors weighing against a finding of “fair use,” reliance on the fair use exception is justified. Where less than half of the factors favor “fair use,” permission should be obtained before copying or disseminating copies of the work or you should consider using other material. If you have questions about interpretation, please contact Sharon Holderman in the Volpe Library (sholderman@tntech.edu).
