## CHECKLIST FOR INFORMED CONSENT INFORMATION FOR USE WITH ADULTS IN EXPERIMENTAL RESEARCH

1.	State that participants must by at least 18 years of age in order
	participate in this study. Bold this information so it cannot be missed. State
	that they should discontinue at this time.
2.	State your name and why you are doing this study. What will the
	information you obtain be used for?
3.	State the purpose of your study? For example, the purpose of the study
	is to develop new study materials or strategies, to provide insight into video
	game playing, to help understand the effects of exercise on stress, etc.
4.	Include how much time the study will take.
5.	State the methods, which you will use. What will be required of the
	participants? For example, read scenarios, watch video clips, ride an exercise
	bike, do mathematical computations, etc.
6.	State any risks, hazards or inconveniences the subject may endure. Will
	the subject experience any discomfort?
7.	Include any benefits, if any, the subject might expect from participation.
	This includes any personal benefits from insights they may gain, from
	participation, any rewards offered, or class credit for participation.
	State any conditions they must meet in order to participate. For
	example, 20/20 vision, particular health requirements, marital status, group
	membership requirements, etc.
	Statement of a guarantee of anonymity or confidentiality. If subjects'
	participation will not be completely anonymous, state the procedures in
	detail of how you will guarantee confidentiality of the information you
	obtain.
	State that the participants may discontinue participation at any time
	without any penalty.
11.	Offer to answer and questions. Include instructions on how to contact
	you should questions arise.
12.	Include a place for the signature of the subject (and experimenter or
	witness if required) and the date. Also provide a space for them to print their
	name since many signatures are difficult to decipher.
