

## A Message from our President

Hi! My name is Braden Morris. I am a senior Biochemistry and Cell and Molecular Biology double major, and I am super excited to be serving you as the 2021-2022 College of Arts and Sciences Student Ambassador President! I have been in the CAS ambassador program since my sophomore year, and I have been an active part of various student giveaways and community service opportunities that we present. I also serve as the current ASBMB Vice President where I have been a member since 2018, and I have been an active member of the UCSC campus ministry for the past four years

What does being an ambassador mean: To me, being an ambassador never means one thing. It is a symbol of outreach, service, and leadership. We are here to serve our community, college, and campus. We represent the students of our

college every time we put on those purple polos and shake hands with department chairs, club presidents, TTU alumni, and prospective students. It has been an absolute privilege to be accepted as an ambassador for the last three years, and I encourage all CAS students to apply to join our team in the future!

In my free time, I enjoy hiking all the cool locations around Cookeville, hanging out with friends, and playing almost any sport you can think of!

Wings up!

Braden
