
RECYCLED MATERIAL ART CONTEST

How It Works

The Recycled Material Art Contest is an event put on by the Office of Sustainability. Create your art, submit an entry through google forms, and bring it to the Sustainability Day Celebration to be displayed for judging.

Turn recyclable items and/or trash goods into any work of art of your choosing. Submissions should be made of 100% recycled or trash goods. Glue, paint, screws, and other fastening devices are not included in the 100% that has to be recycled items, and CAN be used to assist in the creation of your piece.

Entries are submitted under one division with prizes for a judged vote and a people's choice being awarded.

The entries will be on display during the Sustainability Day Event to be judged by fellow students.

Contest Rules

1. 100% of all parts must be from some previous use (recyclable or trash goods). Glue, paint, screws, and other fastening devices are not included in the 100% and can be used in the creation of your art.
2. All entries must be completed as an individual or a group
3. The art work can be an original or inspired by existing pieces. If not an original, credit must be given on the submission form to the inspiration.
4. All decisions of the judges will be final.
5. All entries must be first submitted digitally via our Microsoft Form linked below.
6. In order to be judged, entries must be brought to the Office of Sustainability PRIOR to Sustainability Day Celebration (any time before 10am on October 13)
7. Judging criteria for each project will be based on the following, with a maximum of 10 points in each category: visual impact, creativity, composition/design, craftsmanship, and bonus.

Submitting the Entries

Entries will be submitted via google forms with information about the artist and the art. You must also bring your art to the Sustainability Day Celebration.
