

# Straw Rocket

How can you launch a paper rocket without touching it with your hands?

## What you need:

- Print the rocket template or draw your own
- Paper
- Plastic straw
- Crayons and markers
- Scissors
- Tape

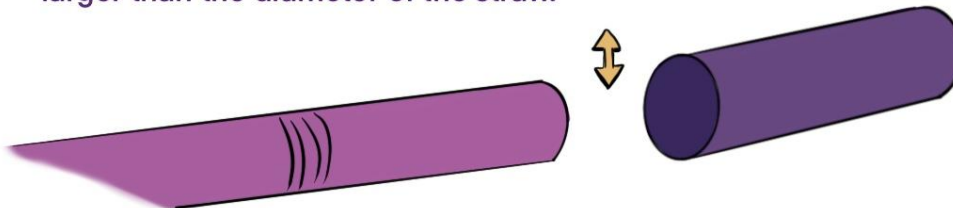

## What you do:

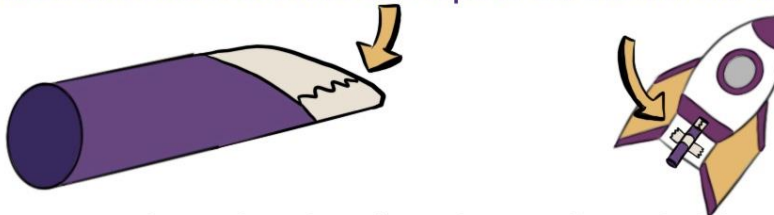

1. Cut out and decorate rocket

2. Fold a small rectangular piece of paper into a tube. This paper should be just larger than the diameter of the straw.

3. Flatted one end of the tube and tape to the back of the rocket.

4. Insert straw into tube. Blow through opposite end of the straw.

5. Can you change anything about your rocket to make it go further?
